Consultant for Private Sector Engagement and CSR Mobilization

Location of the assignment: Dhaka

Duration: From 15th February to 31st March 2026)

Project: Strengthening Household Capacity for Climate Adaptive and Resilient Livelihoods to Tackle Food Insecurity and Under-Nutrition in Southern Bangladesh.

Main Counterparts: HoD, FSL & DRR

Background

The southern coastal region of Bangladesh—particularly Satkhira Sadar—is among the most climate-vulnerable areas due to repeated cyclones, salinity intrusion, and prolonged waterlogging. These hazards severely disrupt agricultural livelihoods and contribute to chronic food insecurity and malnutrition.

Action Against Hunger (ACF) implemented a comprehensive project introducing multiple livelihood strategies (MLS), climate-adaptive homestead food production, asset-based planning, climate-smart agricultural practices, and strengthening linkages with government and private actors. As a result, beneficiary households have become more resilient, diversified in income, and better protected against shocks.

To consolidate, enhance sustainability, and promote these achievements and translate them into concrete business and partnership opportunities, ACF will organize a Lesson-Learned and Private Sector Engagement Workshop, showcasing evidence and models for sustainable expansion. This event also aims to initiate partnerships with private-sector companies that can support future scale-up through their Corporate Social Responsibility (CSR) funds.

To ensure the participation of high-value private-sector actors, ACF seeks to engage a consultant having extensive knowledge and expertise on private sector engagement to identify key decision-makers of key private sector actors, advocate with them, and secure their attendance.

All workshop-related costs (venue, materials, logistics, and refreshments) will be fully covered by Action Against Hunger.
